

THE BLUE WORLD INITIATIVE

PROSPECTUS

Welcome to the Gulf of Guinea Maritime Institute

The Gulf of Guinea Maritime Institute is a maritime think-tank dedicated to ocean literacy advocacy, research and capacity-building. The ethos of our engagement with students is a clear one: to enable students to become active agents of change – so they can take part in initiatives that support ocean protection. At the Gulf of Guinea Maritime Institute, every student really does matter and we work hard to ensure that all is done in the interests of our young and vibrant community - whether that be delivering an ocean curriculum to pass the message of literacy and conservation in the first cycle of education, or ensuring their progression to the most appropriate ocean career pathway.

We provide a positive, supportive and well-disciplined environment which enables all students to fulfil their potential and achieve success in all aspects of their extracurricular life. We want our students to leave with the skills to adapt, flourish and make the most of every opportunity regardless of the challenges they face in an ever-changing world. As a research think-tank, we are uniquely placed to cultivate and match career interests and educational needs. We are fully committed to the highest possible standards of care and guidance.

The United Nations Scientific, Educational, and Cultural Organization (UNESCO) and the United Nations Decade of Ocean Science recognize the Institute as a promoter of ocean literacy principles and interaction with the environment, which reaffirms our vision of fostering a close connection between children and the ocean through outdoor activities and interactions with the global ocean community. The Institute holds a special accreditation status with the United Nations, demonstrating that our programme of work has direct relevance to the aims and purposes of the United Nations Decade of Ocean Science. We also know that to achieve our aims, strong partnerships and effective collaboration are essential. The Institute has a strategic partnership with the United Nations Ocean Decade endorsed Early Career Ocean Professional Programme, and works in partnership with many local and international organisations, including the Ghana Chapter of the Women's International Shipping and Trade Association (WISTA), and the Development of Ocean Technical Capacity with African Nations (DOTCAN) in Nova Scotia, Canada. A strong and effective partnership with parents underpins the work we do with schools to support our students and we look forward to working with you to achieve this.

About the Blue World Initiative (BWI): Unleash your inner Ocean

BWI is an Ocean literacy program for Basic and Second Cycle school students with the knowledge and tools to become informed and engaged ocean stewards. Our ocean covers over 70% of our planet and plays an essential role in regulating climate, providing food and resources, and supporting incredible biodiversity. GoGMI with its flagship program this year seeks to provide an ocean-oriented approach to teaching science standards. Many of us go about our daily lives without realizing how our actions impact the health and sustainability of the ocean and its crucial resources. Likewise, we often overlook how the health of the ocean influences our daily lives. The majority of people are unaware of the ocean's vast medical, economic, social, political, and environmental significance. This lack of awareness, sometimes referred to as "ocean blindness," can be addressed by providing accurate and engaging ocean education. This education encourages a deeper connection with the ocean, which is the essence of ocean literacy: understanding the ocean's influence on us and our influence on the ocean.

Our Educational Goals for Students

Gain a deep understanding of the essential principles and fundamental concepts related to ocean functioning.

Develop the ability to communicate about ocean-related topics in a clear and meaningful way.

Be equipped to make informed and responsible decisions regarding the ocean and its resources.

Identify and explore career opportunities in ocean-related fields.

Our Blue World Programs

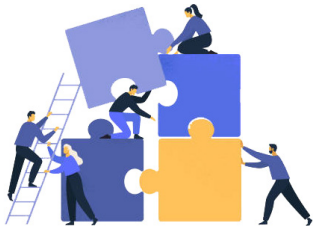

The programs we offer are broad and balanced and offer students the opportunity to discover new talents or interests and develop their skills and existing knowledge. This allows students to make informed and well guided choices as they transition to higher education levels. Breadth and variety are added by the offer of practical and creative subjects which will unearth new talents and develop new skills. The students receive specialist industry and career guidance, and we proactively keep parents informed about the important decisions their children make.

1. Ocean Day Program

Our Ocean Day program is designed to create an interactive and fun adventure that's perfect for students, families, and anyone curious to learn about the ocean world. Through interactive and hands-on experiences, we delve into the various ocean careers and science topics. The program includes practical investigations and experiments to ignite curiosity, while providing expert guidance and mentorship to foster a deeper understanding of the complex relationships within ocean ecosystems.

As students navigate the Day's activities, they develop essential skills in critical thinking, problem-solving, and collaboration. Together with the students, we explore the impact of human activities on ocean health, discover innovative solutions for sustainable ocean management, and uncover the secrets of the ocean's vast resources. Students also get to explore the ocean economy through:

Hands-on games
and challenges

Creative crafts and
art projects

Interactive science
and industry exhibits

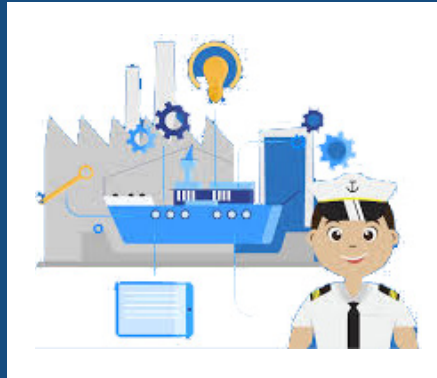

Our Ocean Day program is a unique opportunity for students to gain a comprehensive understanding of the ocean's significance and its relevance to our daily lives. They leave with a newfound appreciation for the marine world, inspired to become the next generation of ocean stewards and innovators.

2. Maritime Career Mini-Classes

Explore the exciting world of maritime careers through our interactive mini-classes and industry tours! Each mini-class offers a bite-sized introduction to a specific area of the maritime industry, including:

Marine Biology and Conservation

Nautical Studies

Oceanography

Seamanship

Maritime Engineering and Technology

Fisheries Management and Sustainability

Plus, students get exclusive access to industry tours, where they'll visit organisations, facilities, ships, and interact with industry professionals.

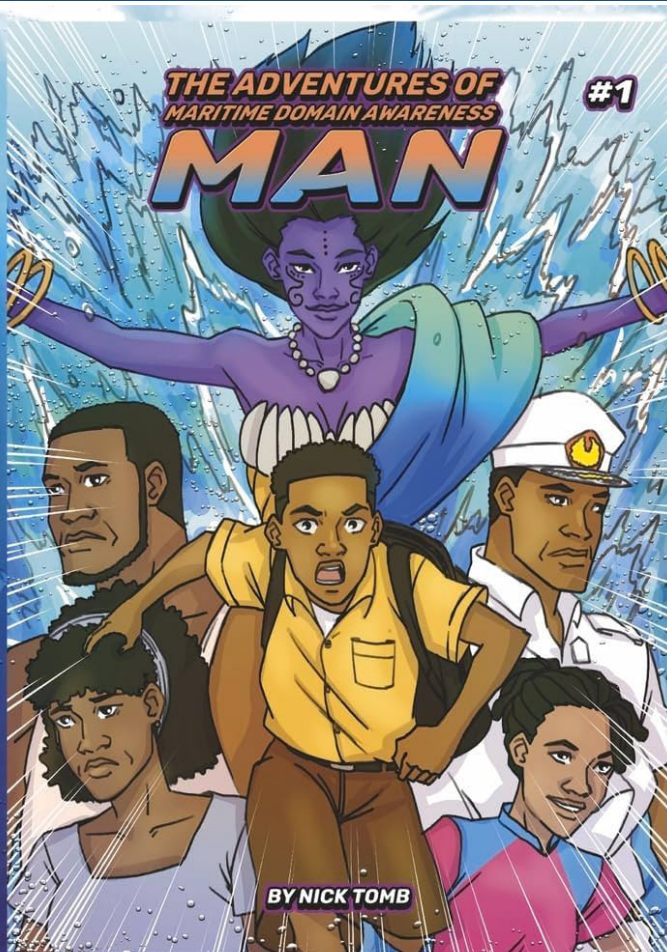

Through hands-on activities, industry insights, and expert guidance, students will:

- Discover new career paths and opportunities
- Develop practical skills and knowledge
- Network with professionals and like-minded students

3. Maritime Clubs

Our Maritime Club offers a comprehensive experience for students to explore the maritime world, develop new skills, and build friendships with like-minded peers. Our club is inspired by the rich maritime history of Ghana, and provides a platform for students to discover the wonders of the ocean, develop leadership skills, and gain mentorship opportunities. Through our club, students will have the opportunity to engage in maritime projects, develop new skills, and shape the future of our maritime community. Our maritime club also provides a range of exciting activities, including:

- Model boat-building and sailing
- Maritime history and research
- Oceanography and marine science experiments
- Nautical arts and crafts
- Team-building challenges and games

We are pleased to welcome you to our Institute. If you would like to arrange a visit, please contact the Institute. Mrs Hassanatus Abdullai, Training Coordinator via hassanatu@gogmi.org.gh or **+233 24 937 3224**.
