with specialisation in the Law of the Sea**

Examples of Ocean-Related Careers

Fun Fact About Blue Careers

Did you know that you can play a crucial role in safeguarding the ocean even if you do not wish to work in the careers listed above?

We'll give you a few examples! Accountants and economists can contribute to initiatives on accounting for the Ocean Economy. Doctors, lab technicians and other categories of scientists can learn more about how the release of toxins into the ocean affect human health. Even psychologists can explore the factors that affect the willingness of individuals to adopt sustainable behaviours that safeguard the ocean and its resources. In almost all career fields, you can carve a unique niche for yourself by specialising in a branch of that career that supports the blue economy!

We hope that this brief has provided you with some useful information about the ocean and the different careers that are available in the ocean-related industry. Remember to stay curious and engaged during the career fair, and take advantage of the opportunity to connect with professionals in the field and learn more about the ocean and its importance.

Want to find out more? Do some online research or reach out to any member of the GoGMI team. We would be happy to talk to you!

Good luck in your future endeavours!
